

LAMILUX receives Architects' Darling Award 2022 Silver

Award for BIM and Product Configurator

For the third year in a row, the Architects' Darling Award has honoured the specialist for daylight systems LAMILUX with silver. In the category "Best BIM Data Offer", LAMILUX's own BIM and product configurator, which covers all the needs of an architect, once again managed to convince the jury.

The jury of the Architects' Darling was already enthusiastic about the configurator tool in 2020 and still is, after further integrated features and products. But what exactly is behind the digital solution for the construction industry? With the LAMILUX product configurator, planners can configure their individual skylights in 3D, generate dimensional drawings, data sheets and tender texts and download the BIM model in different file formats. Architects benefit from the numerous possibilities of LAMILUX products and at the same time can be sure that the product they want can actually be realised.

Configurator tool convinces

The product configurator particularly stood out to the jury, consisting of renowned representatives from the architecture sector, due to its simple and clear handling as well as the extensive download options. For the planner is guided through a self-explanatory and dynamically adapting dialogue. Plausibility checks run in the background and a live 3D viewer supports the planner in his process. Here he can see immediately whether the configured skylight corresponds to his ideas and what the technical values are.

About the Architects' Darling Award

The Architects' Darling was awarded for the twelfth time on 9 November in Celle, Lower Saxony, and honours the "darlings of the construction industry". In a large-scale, multimedia survey conducted by Heinze Marktforschung, architects and planners evaluate different products and solutions of the construction industry. In addition to the product awards, which were evaluated according to various criteria such as personal advice, good experiences and trust in the brand, a top-class team of media and communication experts and renowned representatives of international architectural firms determined the winners of the jury awards.

LAMILUX Heinrich Strunz Group, Rehau

Continuous rooflights, glass roofs or rooflights: the LAMILUX Heinrich Strunz Group is one of the leading manufacturers of skylights in Europe. The skylights ensure efficient use of natural daylight in a wide variety of buildings. In addition, special smoke and heat extraction systems provide safety in case of fire and are therefore essential components of fire protection concepts. LAMILUX is also known for its solutions for object smoke extraction. Furthermore, the medium-sized family business founded in 1909 is one of the world's largest producers of carbon and glass fibre reinforced plastics. These composite materials provide stability, lightweight construction and impact resistance for instance in roof, wall and floor linings in commercial vehicles. The company has around 1250 employees at present and has achieved a turnover of around 335 million euros in 2021.
