LAMILUX Composite Floor Lite

INNOVATIVE FIBREGLASS SOLUTIONS

PRODUCT DESCRIPTION

LAMILUX Composite Floor Lite is an innovative composite floor covering based on a fabric-reinforced fibre composite and PVC floor coverings. By combining the PVC floor coverings with a LAMILUX GRP backing, a multi-in-1 product is created that offers high strength and long-term durability of life even under tough application conditions. LAMILUX Composite Floor Lite is perfectly suited to intelligent and efficient lightweight construction. This is because the integral design makes it possible to minimise work steps during further processing and to keep the production process lean.

VERSIONS

LAMILUX COMPOSITE FLOOR LITE IS AVAILABLE

- in a range of GRP carrier thicknesses from 0.8 mm to 1.5 mm
- in widths up to 3.0 m, depending on the PVC décor layer
- as sheets or coils
- with customer specific PVC top layers (customers provide the PVC)
- with different treatments on the reverse side (sanded or lightly sanded), on request
- optional anti-slip CargoGrip surface with a coefficient of friction $\mu > 0.6$

SPECIFIC PRODUCT ADVANTAGES

- innovative “multi-in-1” floor solution
- whorter process chain for further processing (PVC flooring and GRP already joined)
- carefully tested under conditions similar to practical use
- optimum tensile strength and indent resistance

SECTORS

- Caravan sector
- Bus sector
