

PRESS RELEASE

Rehau, July 2018

LAMILUX at the IAA Commercial Vehicles 2018, Hall 27 Stand D06

Robust lightweight construction

Under the heading of Expertise – Performance – Design, LAMILUX will be exhibiting its latest innovations in Hanover at the IAA Commercial Vehicles 2018. **LAMILUX AntiSlip PES Clean Grip** is an even more wear resistant material for non-slip flooring. **LAMILUX X-treme** provides a lightweight solution for last mile vehicles. The manufacturer can be found in Hall 27 at Stand D06.

New products: an even more scratch-resistant flooring material

The new **LAMILUX Anti Slip PES Clean Grip** incorporates a special granular aggregate to withstand harsher and even more persistent loading conditions. This makes the anti-slip flooring even more robust. Its service life is extended, while the functionality of the material remains unchanged.

Lightweight construction for last mile vehicles

The use of **LAMILUX X-treme** in last mile vehicles ensures considerable savings in weight while nonetheless allowing the construction of extremely robust superstructures. In sandwich constructions or as single sheet, this composite material sustainably reduces the fuel consumption of the vehicles.

Tried and tested in real applications

Three demonstration models will be exhibited at the LAMILUX stand: the applications of the GRP products will be demonstrated using truck, bus and last mile vehicle models. For lorries, the materials used are **High Impact with**

PRESS RELEASE

Rehau, July 2018

AntiBac surface, the non-slip flooring **AntiSlip** and the food-safe HACCP material **Woven Roving 48% Plus SH** for interior walls. In the case of buses, LAMILUX demonstrates its flair for design: **LAMIfoamtex** with its soft-touch surface, **Composite Floor**, which resembles laminate flooring, and **LAMIGraph**, for interior cladding, are the proven materials of choice here. And for roof applications, the manufacturer presents its robust and long-lasting **Woven Roving 48% Gelcoat SH**.

Added benefits shape the development

All LAMILUX products are designed to satisfy a number of requirements at the same time. They always offer at least 2-in-1 or even 3-in-1 benefits. This means that LAMILUX GRP, for example, combines a harmonious appearance with robustness and durability, and reduces processing costs and the number of processing steps for customers at the same time. "The added benefits are the hallmark of our products: we're familiar with the application situations of our customers and produce the ideal products to satisfy their requirements", says Markus Bächer, Head of Marketing. "In this respect, we consider it our job to keep on developing: to serve the customer, whatever the challenge."
