LAMILUX Flat Roof Exit Comfort Square impresses with form and function

Red Dot Award for square design

For the fourth time, the Red Dot Award honours a product from the skylight system specialist LAMILUX for outstanding design quality. "The LAMILUX Flat Roof Exit Comfort Square owes its stylish appearance, which also positively influences energy efficiency, to the skilful interplay of form and function," says the award's high-calibre international jury.

Following the Rooflight F100 Circular and the LAMILUX Glass Skylight FE, the new LAMILUX Flat Roof Exit Comfort Square is the impressive recipient of the Red Dot Design Award in 2021. The LAMILUX Flat Roof Exit Comfort Square combines purist design and function in an unusual way.

The exit to the roof terrace allows daylight to stream into the interior through the 4 sqm glass surface and thus promotes the well-being of residents. The square shape of the skylight makes it possible, for the first time, to also use spiral and

Rehau, July 2021

platform staircases underneath and thus design the rooms in a particularly purist way. Until now, access to the roof was limited to straight stairways due to the elongated rectangular shape of the roof exit. The concealed hydraulic drives silently swing the glass element up to 70 degrees in 45 seconds. This offers a high degree of comfort for the user and saves rare space on the roof terrace.

Stylish appearance impresses the jury

The LAMILUX Flat Roof Exit Comfort Square impressed the jury with its stylish appearance, which it owes to the skilful interplay of form and function, and the advantage that the square flat roof exit has a positive influence on the energy efficiency of buildings. This is how the international jury of the Red Dot Award, which awards the coveted seal of quality, describes it.

The Red Dot is the award for high design quality. The international jury only awards the coveted seal of quality to products that exhibit outstanding design. The long evaluation process of the award is based on various assessment criteria, and the LAMILUX Flat Roof Exit Comfort Square proved its strengths in all these areas. These include ,degree of innovation, functionality and durability, among others.

About the Red Dot Design Award

In order to be able to professionally evaluate the diversity in the field of design, the Red Dot Design Award is divided into three disciplines: Product Design, Brands & Communication Design and Design Concept. With over 18,000 entries, the Red Dot Award is one of the largest design competitions in the world. The Red Dot jury

consists of around 50 international experts who test, discuss and evaluate each submission individually. The Red Dot Design Award is a seal of design excellence that is highly respected internationally.

About LAMILUX Heinrich Strunz GmbH

LAMILUX has been manufacturing high-quality skylights made from plastic, glass and aluminium for roughly 70 years. Architects, construction engineers, planners and roofers use **LAMILUX CI Systems** when building industrial facilities, commercial buildings and industrial shed complexes as well as private residences. The purpose of these structures primarily consists in optimising the use of natural light and guiding it into building interiors. Fitted with controllable flap systems, they also serve as smoke and heat exhaust ventilation systems (SHEVS) and energy-efficient building systems providing natural ventilation. The unique **LAMILUX CI Systems** range includes a wide variety of different structures – from rooflight domes and continuous rooflights through to glass roof constructions in aesthetically pleasing shapes. The company also offers considerable expertise in developing and manufacturing building control systems for activating and automating both smoke and heat exhaust systems and ventilation and solar protection installations. In 2020, LAMILUX, with roughly 1200 employees, generated a turnover of 293 million euros in its two corporate divisions, **LAMILUX Skylights** and **LAMILUX Composites**.

Image descriptions:

The LAMILUX Flat Roof Exit Comfort Square received plaudits at the Red Dot Award for its overall system without thermal bridges, optimised isothermal processes and the option of glazing that meets modern demands for sustainability, energy efficiency and climate protection.

The square shape of the LAMILUX Flat Roof Exit Comfort Square makes it possible, for the first time, to also use spiral and platform staircases underneath and thus design the rooms in a particularly purist way. The excellent interplay of function and form impressed the jury of the Red Dot Design Award.
