

Review Caravan Salon Düsseldorf 2025

# **LAMILUX Composites draws a positive balance: Successful appearance at Caravan Salon 2025**

**Caravan Salon 2025 in Düsseldorf was a complete success for LAMILUX Composites. With more than 800 exhibitors from 41 nations and the second-highest visitor numbers in the history of the event, the trade fair offered the perfect platform to present our latest GRP innovations and to engage in intensive exchange with partners and existing customers.**

Amid this international stage, LAMILUX presented a diverse portfolio of GRP innovations that embody both technological excellence and modern design. From the very first day, the booth in Hall 13, A85 attracted strong attention: trade visitors, partners, and customers took the opportunity to learn more about new materials and application possibilities.

“The response was overwhelming,” reports Theresa Mergner – Caravan Manager at LAMILUX. “We were able not only to deepen existing contacts but also to hold numerous new discussions. Particularly pleasing was the fact that all the innovations presented were in high demand and discussed with great interest. A special highlight was a walk-in motorhome fully equipped with LAMILUX GRP products, which made the possibilities of modern materials impressively tangible.”

Visitors showed particular interest in the presented innovations – from LAMILUX SUNSATIION®, the revolutionary UV-resistant exterior surface, to LAMILUX LAMIfamtex with its textile soft-touch character, and LAMILUX DualStructure, which combines design and functionality in a new way. Our design options LAMILUX LAMIGraph and LAMILUX CompositeFloor also attracted great demand.

### **LAMILUX SUNSATIION® – The revolution in UV and weather resistance**

#### Product description:

LAMILUX SUNSATIION® is the latest generation of high-performance GRP surfaces for exterior applications. With up to 20 times higher UV and weather resistance compared to standard gelcoat systems, SUNSATIION® guarantees permanently brilliant color surfaces – even under extreme conditions. The dirt-repellent, easy-care surface combines maximum functionality with premium design.

#### Properties:

- Up to 20 times higher UV and weather resistance
- Brilliant, durable colors
- Dirt-repellent, scratch-resistant, and easy to clean
- High mechanical strength
- Suitable for exterior applications on caravans, motorhomes, commercial vehicles, construction machinery, etc.

e-Mail: markus.baecher@lamilux.de

Customer benefits:

- For manufacturers: Reduced maintenance effort, long-lasting appearance, premium quality for serial models
- For end customers: Shine like the first day, minimal care required, long-term value stability

**LAMILUX LAMIGraph – Decorative variety with technical power**

Product description:

LAMILUX LAMIGraph is a decorative GRP surface specially developed for the design of high-quality wall paneling in the caravanning sector. The surface impresses with realistic wood, stone, or fantasy decors and combines appealing design with the technical durability of glass-fiber reinforced plastic.

Properties:

- High-quality decors with realistic depth effect
- Scratch- and impact-resistant, moisture-resistant, easy to clean
- Custom colors and designs available
- Formats: Sheet and roll material up to 2.15 m wide, thicknesses 1.0 to 3.0 mm

Customer benefits:

- For manufacturers: Simplified processing, less waste, homogeneous surfaces without joints
- For end customers: Durable, visually appealing wall surfaces with easy cleaning

**LAMILUX LAMifoamtex – Comfort meets lightweight construction**

Product description:

LAMILUX LAMIf foamtex is an innovative GRP surface with a soft-touch feel that combines textile aesthetics with technical robustness. Its sound-absorbing and impact-resistant properties make it the ideal solution for ceiling and wall areas in leisure vehicle interiors.

Properties:

- Soft-touch feel with textile surface
- Impact-resistant and sound-absorbing
- Available in various colors, surface embossings, and thicknesses
- Formats: Roll material up to 2.6 m wide, carrier thickness up to 1.5 mm

Customer benefits:

- For manufacturers: Fast, seamless processing of large areas without lamination
- For end customers: A homely atmosphere with noticeable comfort and acoustic enhancement

**LAMILUX CompositeFloor – The durable flooring professional**

Product description:

LAMILUX CompositeFloor is a GRP-based sandwich floor covering designed for high mechanical loads in mobile use. The odor-free PVC-GRP composite structure is dimensionally stable, lightweight, and moisture-resistant – making it ideal for use in caravan and motorhome floors.

Properties:

- 3-in-1 material with integrated PVC decorative surface
- Rigid under pressure and bending due to GRP sandwich structure

- Water-resistant, completely odor-free, and dimensionally stable
- Reduces overall vehicle weight
- Formats: Sheet or roll material up to 2.8 m wide, GRP carrier thicknesses 1.1 or 1.4 mm

Customer benefits:

- For manufacturers: Dimensional accuracy, efficient processing thanks to 3-in-1 integration, easy integration into production lines
- For end customers: Higher comfort due to odor-free materials, noticeable weight reduction, increased payload, and homely ambiance

**LAMILUX DualStructure – Structure and color newly combined**

Product description:

LAMILUX DualStructure combines structured and smooth surfaces in one material for the first time. The structured area (up to 1.36 m) is separated by a visible, subtle unstructured dividing line, opening up new design possibilities for exterior applications.

Properties:

- Structured strip up to max. 1.36 m, total width up to 3.20 m
- Asymmetrical designs possible
- Available in many GRP qualities
- Numerous color combinations feasible

Customer benefits:

- For manufacturers: Unique design element, market exclusivity, high design and functional integration

e-Mail: markus.baecher@lamilux.de

- For end customers: Innovative look, durability, comfort through well-thought-out functionality

**LAMILUX DualColor & LAMILUX ColorSplit – Customization without extra effort**

Product description:

LAMILUX DualColor enables GRP surfaces with two different colors – ideal for targeted use in interior and exterior areas.

LAMILUX ColorSplit allows multi-colored design zones to be integrated directly into the laminate – for example, to separate functional spaces (such as kitchen/bedroom) or to accentuate brand identities.

Customer benefits:

- For manufacturers: No additional lamination or painting required – suitable for serial production
- For end customers: Brand-true design, clear visual separation, premium look, and integrated color design without foil techniques

**Outlook for 2026**

With this successful appearance, LAMILUX Composites looks to the future with optimism:

“The strong demand for our innovations confirms that we are providing the right answers for the caravanning industry with our solutions. We look forward to deepening the discussions from the trade fair in the coming weeks – and, of course, we are already looking forward to Caravan Salon 2026.”
