

LAMILUX at Solutrans Lyon

LAMILUX Composites presents innovative lightweight and hygiene solutions in Lyon

LAMILUX Composites, the leading manufacturer of fiber-reinforced plastics for dry freight and refrigerated vehicles, will showcase its latest material solutions for transport, cooling, and logistics at Solutrans 2025 in Lyon (November 19–23, 2025). Visitors can find the company in Hall 3, Booth D111.

High-tech composites for the mobility of tomorrow

With its glass-fiber reinforced plastics (GRP), LAMILUX offers durable, robust, and lightweight solutions for vehicle bodies, roofs, side walls, and interior linings. The broad product portfolio impresses with outstanding mechanical properties, high impact resistance, and excellent surface quality – making it ideal for refrigerated trucks, transporters, and trailers.

A particular highlight at the booth is LAMILUX SUNSATIION®, the world's most colour- and gloss-retaining GRP surface. This innovative gelcoat system provides maximum UV protection, maintaining its brilliant appearance even after many years and thus contributing significantly to the long-term value retention of vehicle fleets.

Hygiene and safety in the transport sector

With LAMILUX AntiBac, the company also presents a GRP surface with integrated antimicrobial protection. Thanks to innovative silver ion technology, the surface inhibits the growth of germs, bacteria, and mould by up to 99.9%. LAMILUX AntiBac is therefore ideally suited for refrigerated vehicles, food transportation, or medical applications where the highest hygiene standards are required.

Visit us in Lyon

The LAMILUX Composites team looks forward to meeting customers, partners, and visitors at Solutrans 2025 to discuss innovative ideas and solutions for the transport industry of tomorrow: Hall 3, Booth D111
