

LAMILUX Composites at the Caravan Salon Düsseldorf 2026

Innovative GRP solutions for high-performance and design-oriented recreational vehicles

LAMILUX Composites GmbH will present its comprehensive portfolio of high-quality GRP solutions for the caravan industry at Caravan Salon Düsseldorf 2026. From August 28 to September 6, 2026, the company will showcase innovative materials for use in modern motorhomes and caravans in Hall 13, Booth A85.

The trade fair serves as a central platform for LAMILUX to underline its expertise as a leading manufacturer of fibre-reinforced plastics and to further expand dialogue with international vehicle manufacturers.

Holistic material solutions for caravan construction

The focus of the exhibition is on high-performance GRP system solutions that cover the entire vehicle structure – from the exterior skin to the interior and the floor. The aim is to provide manufacturers with a combination of lightweight construction, durability and maximum design freedom.

Highlights at the booth

LAMILUX SUNSATIION® – Benchmark for exterior applications

At the centre of the exhibition is LAMILUX SUNSATIION® as a globally leading GRP surface for exterior applications. Up to 20 times higher UV resistance compared to standard gelcoats ensures that vehicles retain their colour and

gloss quality even after years of use. This reduces maintenance effort, preserves appearance over the long term and significantly increases value retention.

The stand concept particularly highlights the performance of LAMILUX SUNSATIION® and demonstrates, using real application examples in the vehicle context, how modern exterior surfaces ensure long-term design, quality and functionality.

In combination with additional material and surface solutions, a wide range of design possibilities for manufacturers is also made clearly tangible.

LAMILUX HG 4000 – High gloss and durability

The LAMILUX HG 4000 quality combines the advantages of fibre-reinforced plastics with the appearance of painted aluminium. The high-gloss surface meets the highest design standards while offering excellent UV and weather resistance.

LAMILUX High Strength X-treme – Maximum performance in lightweight construction

With the High Strength X-treme product line, LAMILUX pushes beyond conventional material limits and enables highly efficient lightweight solutions. Significantly increased strength and stiffness values open up new possibilities in vehicle design.

LAMILUX Anti Slip – Safety in use

LAMILUX Anti Slip combines the mechanical advantages of GRP with a durable anti-slip coating and is therefore ideal for safety-relevant applications, particularly in flooring areas.

Design and interior reimagined

LAMILUX also focuses on innovative solutions for the interior:

- LAMILUX LAMIGraph combines high-quality decorative surfaces with durability and moisture resistance and enables a wide range of design options.
- LAMILUX LAMifoamtex offers customised soft-touch surfaces with a three-dimensional structure and also improves interior acoustics.
- LAMILUX DualStructure combines functionality and design in a single product and offers extensive customisation options.
- LAMILUX LAMlstructure features an integrated surface structure for demanding design and functional applications.

These materials open up new possibilities for modern, functional and comfort-oriented interiors.

Functional floor solutions

With LAMILUX CompositeFloor, the company presents a high-performance solution for flooring in recreational vehicles. The odour-free composite floor combines high load capacity with low weight and is ideally suited to the requirements of mobile use.

Trade fair as a platform for innovation and partnership
