

**TÜV SÜD CERTIFIED
QUALITY**

LAMILUX Composites - innovative fiberglass solutions: Our comprehensive and in-depth know-how of our long lasting market experiences define the development of all our products significantly. That means we provide you maximum performance and maximum safety in your applications.

TÜV Süd certified quality: development criteria and tests

Now it's official: The name LAMILUX stands for the highest TÜV SÜD-certified quality! As the world's first manufacturer of fibre-reinforced composites, LAMILUX has recently been awarded the internationally recognised octagon quality seal of the TÜV Süd. Headquartered in Munich, Germany, TÜV employs 17.000 employees at more than 800 different locations worldwide, making it one of the leading testing and inspection organisations. The seal certifies that LAMILUX meets the highest quality control

and quality assurance standards. The company recently opted to have the majority of its laboratory and test facilities appraised and inspected by the TÜV Süd technical inspection agency, thus imposing on itself the highest quality standards. At the end of the detailed certification process, the TÜV specialists had assessed just under 20 analysis, measurement and test methods with regard to their usefulness and validity for quality assurance and product development.
