LAMILUX Glass Skylight F100

Zaltech, Moosdorf

Essential Information

Place / Country:	Moosdorf, Austria
Year:	2016
Building Type:	Industrial Building
Solutions:	Glass Skylight F100 Glass Skylight FE Circular Rooflight F100

In April 2017, Zaltech, was ready to celebrate the opening of their headquarters in Moosdorf, Austria. The company's product range includes mixed spices, flavours and marinades for the food industry, all of which are natural, pure and healthy. The assembly of the new headquarters was designed to be a modern, low-energy construction which required a connection to nature, mirroring the products that the company stands for.

The daylight illumination of the new building presented not only planning but also aesthetic challenges, due to the curved shapes of some of the corridors and rooms. LAMILUX provided a solution with nine Glass Skylights F100 with integrated fall-through protection grids and roof opening sizes from 100 cm x 100 cm to 120 cm x 120 cm, as well as 25 Glass Skylights FE Circular with diameters up to 120 cm. Both shaped versions complimented each room they were installed above, offering not only stylish lighting accents but also excellent energy values.

Some elements are also equipped with a ventilation function or serve as smoke and heat exhaust ventilaton systems to ensure workplace safety. Integrated roof exit functions through offset fittings also contributes to this. In addition to the skylights with real glass, more than 100 Rooflights F100 were installed, which are also equipped with ventilation and SHEV functions.
